

## North American Editor

*Paediatric and Perinatal Drug Therapy* has been fortunate in that for the past seven years Professor Greg Kearns has been the North American Editor. Professor Kearns who is a professor in both paediatrics and pharmacology has decided to resign as North American Editor of *Paediatric and Perinatal Drug Therapy* due to other commitments. Professor Kearns is one of the leading paediatric clinical pharmacologists in the world and is an active researcher in the American Paediatric Pharmacology Research Unit Network.

We would like to thank Professor Kearns for the key role he has played in taking the journal forward. He has been personally responsible for raising the profile of the journal in the North American continent. As well as acting as an editor for North American papers, he has also acted as the editor for all papers submitted from members of the Derby group. This has helped ensure that the peer review process has been maintained and that each article has been judged on its scientific merits rather than simply being accepted because of the name and institution of the authors. We are delighted that although Professor Kearns is

resigning as North American Editor he will remain a member of our Editorial Board.

We are pleased to announce that the new North American Editor will be Professor Michael Rieder who is a professor in both paediatrics and clinical pharmacology at the University of Western Ontario. Professor Rieder has been a member of our Editorial Board since 2002. He has been instrumental in ensuring that the international workshops on paediatric clinical trials run by the journal in conjunction with the ACRP have taken place in the North American continent. We look forward to Professor Rieder's contribution to the journal as the new North American Editor from January 2007.

## **VOLUME 7                      Contents**

Issue 1	<b>Page</b>	
	2	Tranquilliser and hypnotic drug use in French children, adolescents and their families <i>G Michel, C Chambaud-Peycher, D Purper-Ouakil et al</i>
	10	Design of pharmacokinetic-pharmacodynamic (PK-PD) studies in children: a workshop for health professionals involved in paediatric drug research <i>T N Johnson, A H Thomson</i>
	15	Cardiac and central nervous system toxicity with timolol eye drops in an infant: case report and discussion <i>C Gray</i>
	19	Haloperidol decanoate overdose in an adolescent <i>T M Gore, U Garg, G L Kearns</i>
	23	Systemic toxicity with topical ophthalmic medications in children <i>C Gray</i>
	30	Increasing access to medical information <i>I Choonara, P Clarke</i>
	31	Phenobarbital for childhood epilepsy: systematic review <i>D K Pal</i>
	43	Trends in Paediatric Pharmacology and Toxicology
	46	Index for Volume 6
	48	Instructions to authors
Issue 2	<b>Page</b>	
	50	Paediatric pharmacovigilance <i>I Choonara</i>
	54	A taste-testing study in healthy volunteers (children) to investigate children's preference for ibuprofen or placebo suspension <i>S Reader, H Shaw, S Hails</i>
	59	Impact of a paediatric vial on the magnitude of systematic medication errors in neonates <i>K Allegaert, B J Anderson, M Vrancken et al</i>
	64	Improving dose accuracy and reducing medication errors in neonates <i>I Choonara, A J Nunn</i>
	65	Should labouring women take coffee with their steroids? <i>A L Potts, B J Anderson</i>
	74	Trends in Paediatric Pharmacology and Toxicology
	77	Electrocardiographic observations in premature and term infants on cisapride therapy <i>C I Berul, R M Ward, G L Kearns et al</i>
	89	Abstracts from 10 <sup>th</sup> ESDP Congress

Issue 3	<b>Page</b>
	114 Adenosine in paediatric arrhythmias <i>C Wren</i>
	118 Can paediatric junior doctors prescribe competently? <i>L Menon, Z Taylor, DP Tuthill</i>
	121 Prospective assessment of systemic side effects of topical ophthalmic drug administration for screening for retinopathy of prematurity <i>L Willems, K Allegaert, I Casteels</i>
	123 Fetal valproate syndrome: a review <i>U Kini</i>
	131 Trends in Paediatric Pharmacology and Toxicology
	134 Paediatric clinical pharmacology in Europe <i>M Bonati, J Breitzkreutz, I Choonara et al</i>
	138 Generalised oedema in an extremely low birthweight infant during treatment with dexamethasone for chronic lung disease <i>S Iijima, N Uga*</i>
	143 Working together <i>I Choonara, M J Rieder</i>
	144 Abstracts from 4 <sup>th</sup> International Workshop on Paediatric Clinical Trials
	146 Physiology-based versus allometric scaling of clearance in children; an eliminating process based comparison <i>A N Edginton, S Willmann</i>
	154 Instructions to authors
Issue 4	<b>Page</b>
	162 New publisher, new opportunities <i>I Choonara, P Garner</i>
	163 Reducing inter-individual variability in amikacin clearance in preterm neonates <i>K Allegaert, J de Hoon, M Rayyan, J N van den Anker</i>
	170 Registering paediatric clinical trials <i>M Bonati, C Pandolfini, V Rossi et al</i>
	172 Drug metabolism studies in the newborn infant and children using an oral erythromycin breath test <i>C Cocking, E Webster, J McIntyre et al</i>
	178 A single-dose, randomised, crossover study to compare the rate and extent of absorption of lisinopril solution versus tablets in healthy volunteers <i>A C Leary, M Dowling, A Wilson et al</i>
	183 Evaluation of outpatient paediatric drug prescriptions in a teaching hospital in Nigeria for rational prescribing <i>K A Oshikoya, H A Chukwura, O I Ojo</i>
	189 Palatability of two forms of paracetamol (acetaminophen) suspension: a randomised trial <i>D W Herd, B Salehi</i>
	194 Abstracts from 12 <sup>th</sup> NPPG Annual Conference
	202 North American Editor

	I Instructions to authors

\*Please note that the Contents page that was originally published in Volume 7, Issue 3 listed the first author incorrectly for the paper entitled 'Generalised oedema in an extremely low birthweight infant during treatment with dexamethasone for chronic lung disease'. The authors are *S Iijima, N Uga*. Please accept our apologies. The Editor.

## ***Paediatric and Perinatal Drug Therapy***

### **Instructions to Authors**

1. All manuscripts should be in the English language. They should be submitted to Imti Choonara, Academic Division of Child Health, (University of Nottingham) The Medical School, Derbyshire Children's Hospital, Uttoxeter Road, Derby DE22 3DT, UK (Email: imti.choonara@nottingham.ac.uk). Manuscripts from North America should be submitted to Professor Michael Rieder, Department of Paediatrics, University of Western Ontario, Children's Hospital of Western Ontario, 800 Commissioners Road East, London, Canada N6C 2V5 (Email: mrieder@uwo.ca). *Paediatric and Perinatal Drug Therapy* is published, produced and distributed by Informa Healthcare, Telephone House, 69–77 Paul Street, London EC2A 4LQ, UK. Tel: +44 (0) 20 7017 7665; Fax: +44 (0) 20 7017 7831.
2. Electronic submission of manuscripts facilitates rapid publication. Most common word-processor formats are acceptable, although Microsoft Word is preferred. If electronic submission is not possible, then a single copy of the manuscript with an accompanying disk is acceptable. The manuscript should be double-spaced and on one side of the paper only. Each paper should contain the following: (a) a short descriptive title, (b) the name(s) and initials of the author(s), (c) the Centre at which the work was carried out or the location of the author(s), (d) a summary or abstract of the main facts and results (e), an Introduction, (f) separate main sections, (g) a final Discussion or Conclusions section, (h) any acknowledgements and (i) full references to relevant material in the text. Authors are also requested to supply approximately six 'key words', in English, preferably from the Index Medicus Medical Subject Heading (MeSH) list.
3. All drugs and other compounds should be referred to by their internationally accepted generic names and not by individual company trade marks, unless it is essential for clarity, as in the case of combination products, or to avoid confusion, e.g. between different formulations. Specialised abbreviations and symbols should not be used unless first explained in the text. Dosages and measurements should be given in the units in which they were made, but non-metric units should be accompanied by metric (SI) equivalents.
4. Acknowledgement must be given by authors of grants, fellowships, or any commercial assistance received or of any affiliation which is relevant to the work reported.
5. All references should be individually numbered in Arabic numerals and cited where they appear in the text. At the end of the paper, references should be listed in strict numerical order. The names of all authors for each reference must be given (unless there are six or more, in which case the first three should be listed, followed by 'et al.'). They should be followed by: (a) the full title of the paper, (b) the abbreviated title of the journal (ANSI/BSI system), (c) the year of publication, and (d) the volume and page number(s). Reference to books must give the publisher, place and year of publication, name(s) of the editor(s) where authorship is multiple, and first page number of chapter referred to.
6. All tables and illustrations should be provided with short descriptive legends, numbered consecutively, and their relevant position in the text clearly indicated. Tables should have concise headings to all columns and be identified by Arabic numerals, e.g. Table 2. They should be supplied within the files on disk in cellular form rather than in simple tabbed form. Line diagrams should be supplied both as files on disk in either .TIF or .EPS format and in the format of the program used to produce them. If this is not possible, they should be supplied in a suitable finished form for reproduction and in proportion to the single-column width (80 mm) or double-column width (165 mm). Photographic illustrations will usually be accepted. Illustrations should also be identified by Arabic numerals, e.g. Figure 2.
7. Papers are published on the understanding that their copyright becomes the property of the Publishers once they are accepted for publication. Authors must state clearly if the paper is being actively considered for publication or has been published elsewhere in the world. If subject to copyright (and this includes illustrations), copyright clearance is the sole responsibility of the author and must be supplied in writing to the Publishers. Papers first published in *Paediatric and Perinatal Drug Therapy* must not be translated, abridged or reprinted in any form elsewhere in the world without the written consent of the Publishers.
8. Proofs in page form will be sent to the main author for checking provided that this will not result in delayed publication of any issue of the journal. If, because of postal delays, etc. time is limited, the Publishers reserve the right to have proofs checked against original manuscripts by their editorial staff and/or the editors. No major alterations to text will be accepted at proof stage.

# 5<sup>th</sup> International Workshop on Paediatric Clinical Trials

18-19 June 2007, Derby, UK

- ◆ Clinical trial design
- ◆ European legislation
- ◆ Assessing drug effect
- ◆ Safety in clinical trials
- ◆ Trials in developing countries
- ◆ Advances in paediatric pharmacology
- ◆ Medication errors
- ◆ Ethics
- ◆ Pharmacokinetics (basic and advanced)
- ◆ Free communications
- ◆ *Lectures and workshops*

Speakers include:

Brian Anderson  
Maurizio Bonati  
Jörg Breitzkreutz  
Imti Choonara  
Sharon Conroy  
Shinya Ito  
Evelyne Jacqz-Aigrain

Greg Kearns  
Hussain Mulla  
Tony Nunn  
Michael Rieder  
Alison Thomson  
Richard Tiner  
John van den Anker

## PAEDIATRIC CLINICAL PHARMACOLOGY

Edited by

**Evelyne Jacqz-Aigrain** *Hopital Robert Debre, Paris, France*

**Imti Choonara** *University of Nottingham, UK*

January 2006 / ISBN: 0824721896 / 500 pp. / List Price: \$169.95

**Special Offer: \$152.95** (Please refer to discount code DFL05DK20)

The treatment of children with medicinal products is an important scientific area. It is recognised that many medicines used extensively in paediatric patients are either unlicensed or off-label. This textbook will help paediatric health professionals effectively treat children with the most appropriate medicine with minimal side effects.

This source covers

- the generic principles behind the use of medicines in children
- the science of paediatric clinical pharmacology, clinical trials, and aspects relating to formulation development
- specific clinical areas encompassing the fetus, neonate, and child

**Contents:** Drug Evaluation in Children • Paediatric Clinical Pharmacology • The Administration of Medicines to Children • Drugs in Pregnancy and Lactation • Medicines in Neonates • Infections • Critical Care, Neurology, and Analgesia • Immunosuppressants, Rheumatic and Gastrointestinal Topics: Clinical Section (A) • Respiratory, Endocrine, Cardiac, and Renal Topics: Clinical Section (B)

# **Introduction to Paediatric and Perinatal Drug Therapy**

*Edited by I Choonara, A J Nunn and G Kearns*

The aim of this book is to improve the use of drug therapy in paediatric patients of all ages. Clear and concise chapters offer an insight into key aspects of paediatric clinical pharmacology and pharmacy.

- Introduction to clinical pharmacokinetics
- The effect of age on drug metabolism
- Drug toxicity
- Ethical issues in research with children
- Licensing
- Pharmaceutical industry viewpoint
- Extemporaneous formulations
- Advances in oral formulation development
- Inhalational devices for young children
- Placental transfer of drugs
- Surfactant therapy in neonates
- The use of aminoglycosides in neonates
- Antibiotics for acute otitis media in infancy
- Pain assessment in children
- Medication errors

**Paperback 238 pages**

**ISBN 1-897676-37-9**

**£25.00 (approx. US\$46.00 or 36.00 Euros)**
